questions

Guideline

There are 4 questions in the exam. Write all your answer in a separate paper/file, take picture of it and create a pdf file containing all answer. For each question there is a submit button. You can simply click on submit button. You need to submit the merged PDF at the end of the question (There is an option for uploading file)

For question number 4, You MUST submit in buX.

While drawing the diagrams you can draw it by hand or use any tool (Optional). Drawing in tools might take longer time. So you are advised to avoid tools.

This site can be used to convert images to pdf: <https://smallpdf.com/>

Also, it would be good if they can compress the files where compression rate is 90%+: <https://www.wecompress.com/en/>

File preparation can take full 30 minutes, so prepare your file well before the ending time

You are given only one attempt to submit the answers. So before pressing Submit button, make sure that is your final answer.

Total duration is 90 minutes. (75 minutes for exam , 15 minutes for file uploading your

choice how to utilize the time)

Contact us if you failed to complete the exam in time.

Mohammad Iqbal Hossain: 01715065301 or iqbal.hossain@bracu.ac.bd

Mostafijur Rahman Akond: 01922430492 or mostafij.akhond@bracu.ac.bd

Asadullah al galib: **01709145454 or asadullah.al.galib@g.bracu.ac.bd**

Joydhriti Choudhury: joydhriti.choudhury@g.bracu.ac.bd

A viva session might be conducted after the exam.

1

0 points possible (ungraded)

Being inspired by the UK smart grid project, Bangladesh Power Development Board (BPDB) also wants to develop a similar system to manage power generation and smart distribution throughout the country.

- Identify at least 3 functional requirements.
- Identify at least 2 non-functional requirements. (5 marks)

Submit

You have used 1 of 1 attempt

2

0 points possible (ungraded)

Consider the following community lending and investment system:

Interested lenders can select any projects or businesses to invest in. Each lender has a unique ID, TIN, phone number, address and bank statement for up to five months. Each project or business has a title, description, business model and financial projection for a year. Lenders can contribute to multiple projects at the same time. However, the system will keep track of all lender and borrower deals through separate agreements. For all their investments, lenders can generate their own financial reports. For borrowers, following data points are stored - ID, NID, phone number, address and business registration number. Borrowers can post projects with necessary information to attract contributions from multiple independent lenders. Both lenders and borrowers can lend and return money respectively through installments. All monetary transactions can be handled either through bKash or bank payments.

Design a class diagram based on the above information. (10 marks)

Submit

You have used 1 of 1 attempt

3

0 points possible (ungraded)

A Real Estate Inc. (Homebea) sells houses. People who want to sell their houses sign a contract with Homebea and provide information on their house. This information is kept in a database by Homebea and a subset of this information is sent to the citywide multiple listing service used by all real estate agents. Homebea works with two types of potential buyers. Some buyers have an interest in one specific house. In this case, Homebea prints information from its database, which the real estate agent uses to help show the house to the buyer (a process beyond the scope of the system to be modeled). Other buyers seek Homebea's advice in finding a house that meets their needs. In this case, the buyer completes a buyer information form that is entered into a buyer database, and Homebea real estate agents use its information to search Homebea's database and the multiple listing service for houses that meet their needs. The results of these searches are printed and used to help the real estate agent show houses to the buyer.

Draw a Activity diagram based on the above scenario. (10 Marks)

Submit

You have used 1 of 1 attempt

4

5.0/5.0 points (graded)

Calculate BEP for the following information.

	Year 0	Year 1	Year 2	Year 3
Total benefit	0	47881	43627	32638
Total cost	43826	22973	16045	15910

Enter BEP (Round the value to 2 decimal point. Ex: 2.09, 3.50, 4.65 etc). Answer is:
1.6858820970197956

1.69

Submit

You have used 1 of 1 attempt
