Quiz 4

Graded Quiz due Sep 12, 2021 19:30 +06 Completed[Bookmark this page](#)

Multiple Choice

2.0/2.0 points (graded)

Which of the following statement is true?

- ☒ Denormalizing increases speed of access while it reduces storage efficiency
- ☐ Intrafile clustering increases storage efficiency as well as speed of access
- ☐ Normalization decreases both storage efficiency as well as speed of access because it removes redundant data
- ☐ All of the above

Customer Relationship Management (CRM) software allows B2C businesses to maintain relationships with their customers by providing a platform on which the customer can directly communicate with a business representative or vice versa. The image below shows a small part of the physical model. State what is the mistake in it.

- ☐ The id has to be of integer format instead of uuid

☐ The Employee_id in the Representatives table has to be of integer type

☒ The diagram is a logical model and not a physical model because it can be further optimized

☐ There is nothing wrong with the shown physical model

Bangladesh Bank wants to have a system developed so that they are better able to track all monetary transactions and financial status of the country. The main objective of the system is to provide sufficient information to the top executives in order to help them figure out what kind of policy to implement to control the rate of inflation of the country. Your company was selected to build this system, and after performing all the groundwork, now it is time for you to select a storage format. Which would be the best format to use and why?

☐ Files, because they support simple data structures and can be used for transaction processing

☒ Relational DBMS, because they support simple data structures and help in decision making

☐ Object Oriented DBMS, because they support complex data structures can be used for transaction processing

☐ Multidimensional DBMS, because data warehousing needs to be implemented and it can be used for decision making ✓

What is the main main advantage of using De-Normalization?

☐ Update is cheap

☒ Data retrival is faster

☐ Less storage is needed

☐ Data becomes consistent

You are designing a software product which is the first of its kind in the industry, and on one else has ever built anything like this before, this means that neither you nor your users know what the interface should look like. How would you evaluate the interface that you design?

☐ Heuristic evaluation

☒ Walk-through evaluation

☐ Interactive evaluation

☐ Formal usability testing ✓

In system analysis and design which of the following is / are true?

☐ a. It is an effective communication medium between a human and a computer

☐ b. It identifies interface objects and actions

☒ c. It creates a screen layout that forms the basis for a user interface prototype

☐ a and c

☐ All of the mentioned above ✓
