

Component diagram

BracU is redesigning its entire software suite to be more adaptive and to come out of its existing monolithic structure to microservices dependant structure. This transition will of course require a great deal of planning and organization and will have to be done in parts to avoid drastic repercussions. As such, you have been tasked with creating the component diagram for the initial phase which will consist of the following:

Component Name	Parent Component	Depends on	Interfaces provided
Authentication and Authorization	N/A	● Student records ● Faculty records ● Non-admin staff records ● Admin staff records	● SAML Authentication ● OIDC Authentication ● OAuth Authorization
SSO	Authentication and Authorization	● Student records ● Faculty records ● Non-admin staff records ● Admin staff records	● SAML Authentication ● OIDC Authentication
PAM	Authentication and Authorization	● Student records ● Faculty records ● Non-admin staff records ● Admin staff records	● OAuth Authorization
Staff and Student Records	N/A	● N/A	● Student Records ● Faculty Records ● Non-admin Staff Records ● Admin Staff Records ●
Evaluation	Evaluation	● SAML Authentication ● OIDC Authentication ● OAuth Authorization ● Faculty records ● Non-admin staff records ● Admin staff records	● Evaluation by Student ● Faculty Evaluation Results ● Evaluation by Head ● Staff Evaluation Results
Faculty Evaluation	Evaluation	● SAML Authentication ● OAuth Authorization ● Faculty records	● Evaluation by Student ● Faculty Evaluation Results
Staff Evaluation	Evaluation	● OIDC Authentication ● OAuth Authorization ● Non-admin staff records ● Admin staff records	● Evaluation by Head ● Staff Evaluation Results

Construct the component diagram
