problem

1.0/1.0 point (graded)

Suppose in a state space graph, all the step costs differ from each other, there is one optimal goal, and three suboptimal ones. Then which of the following search techniques would guarantee to find the optimal goal using the optimal path?

☐ BFS

☐ DFS

☐ DLS

☐ IDS

☒ None of the above

Submit

You have used 1 of 1 attempt

problem

1.0/1.0 point (graded)

How many children of each node are visited next to that node in DFS per step?

☒ 1

☐ 2

☐ 3

☐ 4

Submit

You have used 1 of 1 attempt

problem

1.0/1.0 point (graded)

Which of the following does BFS expand next in line?

☐ Lowest cost node

☒ Shallowest node

☐ Deepest node

☐ Any random node

Submit

problem

1.0/1.0 point (graded)

If a search tree has 3 maximum depth and 2 branching factors then how many possible nodes(including root) are in that tree?

☐ 8

☐ 9

☐ 14

☒ 15

Submit

You have used 1 of 1 attempt

problem

1.0/1.0 point (graded)

How is a card game different from an 8 puzzle game in terms of environment?

☐ Sequential

☒ Stochastic

☒ Partially Observable

☐ Discrete

Submit

problem

1.0/1.0 point (graded)

Which of the following is a limitation of table driven agents?

☒ Look up table too large to generate and store

☒ Non adaptive

☒ No previous knowledge

☐ Reactive to the environment

Submit

You have used 1 of 1 attempt

Show Answer

problem

0.75/1.0 point (graded)

If all the weights of a graph are the same and we apply Uniform Cost Search, we get:

☒ BFS when Queue is used as a fringe *

☐ BFS when Stack is used as a fringe

☐ DFS when Stack is used as a fringe ✓

☐ None of the above

Submit

You have used 1 of 1 attempt

problem

0.75/1.0 point (graded)

Select the game-environment pair which are correct.

☒ Poker-Partially observable *

☐ Chess-Dynamic

☐ Ludo-Stochastic ✓

☐ Self driving car-Discrete

Submit

problem

0.0/1.0 point (graded)

$O(b^x)$ is the time complexity of which algorithm ?

☐ DFS when x is the maximum depth ✓

☐ BFS when x is the shallowest depth ✓

☒ BFS when x is the effective depth

☐ UCS when x is the effective depth ✓

✗

Submit

You have used 1 of 1 attempt
