

BRAC UNIVERSITY
Department of Computer Science and Eengineering

Examination: Quiz 4
Semester: Spring 2024

Duration: 35 min
Full Marks: 20

CSE 470: Software Engineering

Name:

ID:

Section:

Set-A

We all know that Messi is the G.O.A.T of football. But it is true that he cannot play forever as he will have to retire. That's why he wants to make an app so that he can help the other students who want to be like him. He thinks that "10 minutes School of GOAT" will be his app name. He will take classes once a week. He wants to add other footballers who are also famous (but not that much, like Ronaldo), they can also take classes. Students have to register in particular courses so that they can learn from GOAT. Messi also wants to use AI based software that can give updates to the assigned students about course time, payments and so on. AI also makes it private so that particular students will get the update for that particular course.

- 1) Which pattern/patterns can be more suitable for the above scenario and why. [8]
- 2) Write the code based on the above scenario. [12]
